

TOOLS SUPPORTING THE PRACTICAL IMPLEMENTATION OF THE AWS STANDARD

GAWFC : Geographic Agricultural
IN THE CLOUD : Water Footprint Calculator

For Farm Water Balance

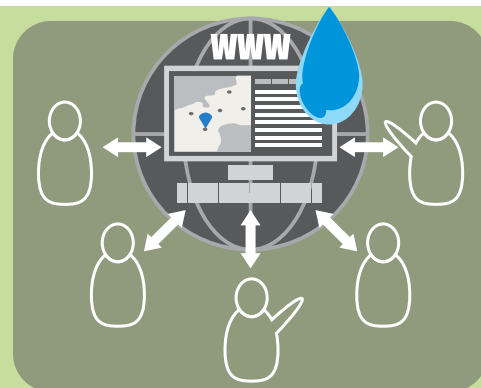

- Daily soil water balance.
- Assess farm water use efficiency and productivity.
- Water use benchmarks across farms and years.
- Target setting at the farm level.

WATER CANVASES

: Design thinking for water

For rapid learning on key water + supply chain topics and creating collaborative work

- 20 design tools to guide and implement water stewardship, water policy and strategy, collective water actions with farmers, joint water target setting, and much more.
- Increased water capacity and water collaboration across the supply chain.

WIS : Watershed Information
ONLINE : System

For visualisation of maps and organisation of catchment info

- Public and semi-private disclosure of customised maps and catchment information.
- Geographic tool supporting collaborative water work.

ABOUT GSI

Good Stuff International is a consultancy company. In our work we engage with people at all levels of society to design and implement productive activities to sustain healthy catchments and ecosystems.

Global environmental change puts agricultural supply chains and the resilience of catchments and ecosystems more at risk. We help you understand the importance of water and ecosystems to your agricultural supply chains. And **we work with you to design, implement and monitor strategy and action to make your agricultural supply chains and the catchments and ecosystems they depend on, more resilient.**

In our work, we use proven approaches, methodologies and tools: the WaterData4Action approach, the water risk and water balance methodologies, and the Geographic Water Footprint Calculator, Water Canvases and Watershed Information System tools.

These tools, methodologies and approaches were used in the implementation of the AWS standard for the Iberesparagal farm in South of Spain, which achieved Gold certification. The latter is currently leading to collective actions and wider implementation of water stewardship in the region.

To learn more about these tools, please check the other side of this brochure.
